

## USE & CARE INSTRUCTIONS

### Hearing Protection For Noise & Water

Congratulations on choosing Earmold Australia® Class 5 custom made earplugs made especially for you. The hearing protectors have been tested in accordance with Australian & New Zealand Standard AS/NZS 1270-2002. GJC Certificate No: 90502.

Follow these easy instruction & you will be assured of comfortable, safe, effective sound attenuation.

**TO INSERT:** Take the earplug for the right ear and place the stem (the part which enters the ear canal) at the opening of the ear canal. With a backward rolling motion seat the earplug into the ear, ensuring the top of the plug is under the fold of the ear. If you have fitted your earplug properly it will fit comfortably & firmly in your ear. Repeat the above steps for the left earplug. If your plugs are fitted with a cord the red tab is for the right ear & the blue tab is for the left ear. Place the cord behind your neck when wearing your earplugs for safety.

**TO REMOVE:** Start at the back of the ear & pull down on the top of the earplug then begin to roll the earplug forward & out of the ear. After a few times you will develop your own technique. **DO NOT** pull on the cord to remove the earplugs as it may cause damage to the earplugs or your ears.

**NOISE USE:** Always wear your earplugs in noisy areas.

Noise induced hearing loss can go unnoticed until serious hearing difficulties arise in hearing & understanding speech, by then normal hearing cannot be restored. **ALWAYS** protect your hearing.

**WATER USE:** The earplugs offer a watertight seal for swimming, showering or bathing. In all cases ensure your earplugs are seated correctly & tightly.

***Not recommended for scuba diving.***

**CARE:** Wash with a mild soap & warm water. Rinse & dry thoroughly. **DO NOT** use harsh detergents or cleaning compounds. Store your earplugs in the pouch provided to keep them clean & ready for use.

**NOTE:** If your earplugs become loose, uncomfortable or damaged **DO NOT** try to repair them yourself. If they have split **DO NOT** continue to wear them, contact us immediately. The earplugs come with a 12 month warranty against splitting or cracking.

Warranty does not cover damage caused by misuse. Any issues should be reported immediately, we are committed to providing you with effective hearing protection & can easily correct the fit.

### **EARPLUGS FITTED WITH SPEAKER:**

Insert & remove the earplugs as per the instructions above, **DO NOT** pull on the wire to remove from ears. protect the earplugs & speaker unit by storing them in case provided. The earplugs provide a Class 5 hearing protection therefore we recommend the volume on your music device is reduced when wearing fitted with stereo wires.
